

Dear Chairman Michael Powell:

Please reconsider de-regulation or relaxing of current rules that require incumbent local exchange carriers (ILECs) to share their network facilities with competitors.

We are at the mercy of ILECs that have the luxury of working at their own pace with little consideration for individuals and small companies. Competition requires access. Fairness requires balance. We look to the FCC and people like you, Chairman Powell, to find balance for ILECs to provide an umbrella of support while enabling competition to improve services.

Sincerely,
Margaret Miura
